Harmony™

LOCK AND LATCH SYSTEM

Next Generation Combination Lock
Designed for Ease of Installation
and Operation.

Easy, intuitive operation allows for locking, unlocking, or activating the tilt latches for cleaning!

Harmony™ LOCK AND LATCH SYSTEM

Truth's New Harmony System

Building on the popularity we received on our award-winning Fusion™ System, Truth Hardware has now embarked on the next generation combination lock and tilt latch system named the Harmony™ System. Aptly named as this system beautifully integrates the check rail lock and tilt latch together in a manner which creates a new level of installation ease.

Integrated Technology

The Harmony™ System has been designed to allow the homeowner to activate the lock and tilt latches from the same device. By simply manipulating the lever, an individual can both lock, or unlock their window, and activate the tilt latches to pivot the sash to allow for ease of cleaning. Manufacturers will appreciate the ease of installation as you just snap in the tilt latch, screw down the lock and you are good to go! The Harmony system even self-locates for you!

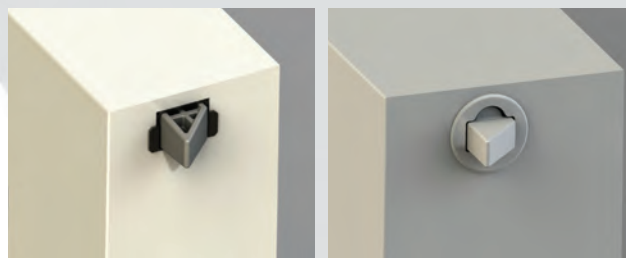

Harmony offers multiple setback distances to meet a variety of widths.

Key Benefits:

- Lock and tilt latch release are actuated by one mechanism
- Slots in the tilt latch make locating the lock attachment easy!
- The same tilt latch allows for multiple placements from the ends of the rail, thus reducing the number of required SKU's
- Latches are hidden within the checkrail, thus producing cleaner site lines on the window

Logo Options

You can personalize the Harmony™ System with your logo. Truth's pad printing process is a great way to highlight your company's identity and reinforce your brand in the marketplace.

Two Tilt Latch Styles To Choose From

Multi-functional system streamlines installation by eliminating complex step of connecting the lock with the latches!
