Strength And Versatility
In A Sleek And Stylish Look!

Smooth Trouble-Free Locking Action—

For Both Casement and Awning Windows!

Encore® Multipoint Locking System Brings Innovation To A New Level

Encore® provides a complete locking system for casement and awning windows. With fully concealed locking and sequential engagement, the Encore Lock brings innovation to a new level. The Encore Lock features the following advancements:

- **Easy to install**—fewer screws, fewer parts, prelocated guides and simpler side stop machining.
- **Stronger**—Tested beyond DP 85 on a 36" x 72" window with only three lock points. The Encore is also rated to 400 lbs. per lock point, depending upon application.
- **Handle action**—Built-in detents, reduced handle to jamb contact, and a tighter escutcheon which is more resistant to insect and light infiltration.

Encore offers a number of new features unique to the window industry, including an option for securing round-top windows and a built-in construction handle which allows window to be operable prior to painting or staining.

Features & Benefits

- Encore's interchangeable handle and escutcheon design allows the homeowner to easily change the color and style of the hardware
- Escutcheon snaps into lock drive rather than into wood
- Lock points above and below handle
- Detent in locked and unlocked positions eliminates tie bar drop in shipping and helps to pass impact testing
- No longer requires CNC machining of the stop
- Pre-located guide on tie bars with snap feature
- Single kerf locating allows use of a single screw at each guide which reduces machining and installation time and cost.
- Handed tie bar (1, 2 or 3 locking points)
- Available with surface mount or recessed (biscuit-style) keepers
- Stainless steel components for coastal applications available
